CAREER OBJECTIVE

I am a driven full-stack web developer who enjoys working independently and with a team.

I aim to apply my technical knowledge and skills to create products that are well-crafted with clean, efficient code.

I mainly code using Javascript and the MEAN Stack, but I am beginning to dabble in ReactJS and C# as well.

EDUCATION

Full Stack Web Development
Devmountain | Provo, UT

General Studies
Kankakee Community College | Kankakee, IL

Business Management & Technology
Kankakee Area Career Center | Bourbonnais, IL

EXPERIENCE

Spring 2016 - Present   **DevMountain**
Mentor & Jr. Web Developer
Mentoring a group of new developers with responsibilities such as assisting in lectures, curriculum prep, and leading in toy problems/discussions. As a Jr. Web Developer, I work on internal DevMountain projects which use technologies such as Node, Angular, Express, CSS/Sass/Less, and more.

4 Months   **ProviderTech, LLC**
Marketing Intern
Worked alongside CEO to meet with the company's potential clients, prepared marketing materials, data entry, and maintained the company's social media.

3 Years   **Volver Boutique, Inc.**
Assistant Store Manager
Increased revenue by 63.7%, co-created sales goals and employee incentives, supervised sales staff

TECHNICAL SKILLS

- JavaScript
- HTML5
- CSS3
- AngularJS
- JQUERY
- Git
- MongoDB
- Express
- Node.js
- D3.js
- SASS/SCSS
- LESS

PROJECTS

DevGlobe | **Group**
Built and maintained the back-end using MongoJS to store student information, and location coordinates. Displays DevMountain students' "impact on the world" on an interactive globe created entirely from D3.js.
globe.geordyn.com

Appointment Scheduler | **Personal**
Website using the full MEAN stack, JavaScript Full Calendar, and D3.js. Intended for the use of salons. Some features include: multi-employee scheduling, employee time cards, and employee stats page based on customer reviews.
